

Dr. Ken Anderson, Announces his 25th Robotic Hair Restoration Surgical Procedure with ARTAS

Dr. Ken Anderson, pioneer of Robot-Assisted hair restoration surgery in Atlanta, has performed his 25th surgical procedure with ARTAS Robotic System.

Atlanta, GA March 12, 2014

Dr. Ken Anderson of Atlanta Hair Science Center has performed his 25th Robotic Hair Transplant surgery. In September 2013 Dr. Anderson became the first surgeon in Georgia to use the ARTAS Robotic Hair Restoration Surgery System for FUE hair restoration procedure. With this state-of-the-arts system Dr. Anderson is able to transplant hair without any linear or noticeable scarring, using no scalpels, no stitches, with a dramatically shorter recovery period than for patients who received a traditional linear strip method hair restoration.

The ARTAS Robotic System brings a new edge to hair transplantation. Each individual hair is removed and transplanted to give a natural result. The minimally invasive procedure is generally done on an out-patient basis. The ARTAS Robotic System algorithmically selects each follicular unit and harvests only what is needed. Image-guided precision ensures optimal spacing is maintained between each hair to preserve the natural look.

About the Doctor

Dr. Ken Anderson is a double-board certified facial plastic surgeon who has been practicing hair restoration surgery exclusively since 2003. He has been an invited lecturer on hair restoration around the world. He is the Founder and Director of the Anderson Hair Science Center in Atlanta. Dr. Anderson is supported by a talented and experienced team of nurses and technicians who specialize in the field of hair restoration surgery.
